

simplifying Document Management

RocketDMS

- **ONE AUTHORITATIVE VERSION**

Guarantees that you are working with the latest and correct version at all times.

- **QUICK AND EASY**

No knowledge of file locations required. Enter a word or two about your required file and double click on one of the results.

- **INEXPENSIVE**

One off license fee. Use for as long as you require. License upgrades and renewals are only required to access new features.

- **OPEN**

You are not locked into using RocketDMS to access your documents. All files and data are stored in open databases that are fully accessible to hundreds of other programs and systems.

TIME SAVING DOCUMENT MANAGEMENT THAT WORKS FOR YOUR BUSINESS

RocketDMS stands out from the pack due to a number of innovations.

You can add, index and search paper documents, or any other physical item for that matter, without converting them into an electronic format. No scanning required. (although scanning is built in and can be used if needed).

The document database is special too. Most other systems that we know of store the latest document version only, along with a log of changes that may have been done. Our document database stores documents in a far more powerful way. An exact copy of any file from any time in history can be retrieved and used by you.

Everything that RocketDMS does has come from customer and user feedback. We pride ourselves on listening to your needs and delivering a system based upon those needs.

There are many features not mentioned on this pamphlet. We encourage you to visit the RocketDMS web site for further information and a comprehensive list of features and capabilities or to just call for a chat.

Contact us to arrange a demonstration.
